

MediaWiki:External_image_whitelist

#Leave this line exactly as it is

```
#Put regular expression fragments (just the part that goes between the //) below
#These will be matched with the URLs of external (hotlinked) images
#Those that match will be displayed as images, otherwise only a link to the image will be shown
#Lines beginning with # are treated as comments
```

```
#Put all regex fragments above this line. Leave this line exactly as it is
```
