

Usage

`{{Allcaps|your text}}` will display your text in full upper case. Your source text is not altered (a copy-paste will give it in its original form), only the way it is displayed. You can use this template to control the display of the variable output of magic words and of other templates.

In: `{{Allcaps|The ''Name'' of the Game}}`

Out: The *Name* of the Game

Preferably do not subst: it because the result will NOT be an uppercase source text but the original text wrapped in HTML code making it appear uppercase, so it is more efficient for this purpose to simply rewrite the text in uppercase once and for all.
