

{{{text}}}

[edit] [purge] [Template documentation](#)  
 This documentation transcluded from Template:Cmbox/doc([edit](#) | [history](#))  
 This is the {{cmbox}} or **category message box** meta-template.

It is used to build message box templates for category pages, such as {{CatDiffuse}} etc. It offers several different colours, uses default images if no image parameter is given and it has some other features.

This template works almost exactly like {{ambox}} and uses the same parameters.

## Contents

- [1 Usage](#)
- [2 Category message box types](#)
- [3 Other images](#)
- [4 Special](#)
- [5 Parameters](#)

## Usage

Simple usage example:

```
 {{cmbox | text = Some text.}}
```

Some text.

Complex example:

```
 {{cmbox
| type      = style
| image     = [[Image:Emblem-question-yellow.svg|40px]]
| style     = width: 400px;
| textstyle = color: red; font-weight: bold; font-style: italic;
| text      = The message body text.
}}
```

The message body text.

## Category message box types

The following examples use different **type** parameters but use no image parameters thus they use the default images for each type.

type=speedy ? Speedy deletion templates.

type=delete ? Deletion templates.

type=content ? Major warnings and problems.

type=style ? Minor warnings and problems.

type=notice ? Notices and messages of any kind, both permanent and temporary.

type=move ? Move, merge and split messages and proposals.

type=protection ? Protection templates.

## Other images

The default images shown above are mostly for convenience. In many cases it is more appropriate to use more specific images. These examples use the **image** parameter to specify an image other than the default images.

type = style

image = [[Image:Sub-arrows.svg|40px]]

This image is used for {{verylarge}} and {{CatDiffuse}}.

## Special

Some other parameter combinations.

No type and no image given (**default**)

No type and **image=none** ? No image is used and the **text** uses the whole message box area.

image = [[Image:Gnome globe current event.svg|42px]]

imageright = [[Image:Nuvola apps bookcase.svg|40px]]

**This category lists articles about current and recent spaceflights.**

## Parameters

List of all parameters:

```
{ {cmbox
| type  = speedy / delete / content / style / notice / move / protection
| image = none / [[Image:Some image.svg|40px]]
| imageright = [[Image:Some image.svg|40px]]
| style = CSS values
```

## Template:Cmbox

```
| textstyle = CSS values  
| text   = The message body text.  
} }
```

### type

If no **type** parameter is given the template defaults to type **notice**. That means it gets a blue background.

### image

**No parameter** = If no **image** parameter is given the template uses a default image. Which default image it uses depends on the **type** parameter.

**An image** = Should be an image with usual wiki notation. 40px - 50px width are usually about right depending on the image height to width ratio. (But the message box can handle images of any size.) For example:

```
image = [[Image:Sub-arrows.svg|40px]]
```

**none** = Means that no image is used.

### imageright

**No parameter** = If no **imageright** parameter is given then no image is shown on the right side.

**An image** = Should be an image with usual wiki notation. 40px - 50px width are usually about right depending on the image height to width ratio. (But the message box can handle images of any size.) For example:

```
imageright = [[Image:Nuvola apps bookcase.png|40px]]
```

**Anything** = Any other object that you want to show on the right side.

### style

An optional CSS value used by the entire message box table. Without quotation marks " ". For example:

```
style = margin-bottom: 0.5em;
```

### textstyle

An optional CSS value used by the text cell. For example:

```
textstyle = text-align: center;
```

### text

The message body text.
