

Template to aid switching the font-size used for a text string.

### Syntax

`{ {resize|N|text} } or {{resize|text}}`

*N* specifies a size, such as "90%", "1.2em", etc. For the default case (the second above), *N* is set to "90%".

### Examples

```
{ {resize|1.2em|This text is 0.2em larger than  
normal} }
```

```
{ {resize|80%|This text is 80% normal size} }
```

```
{ {resize|This text defaults to 90% normal size} }
```

This text is 0.2em larger than  
normal

This text is 80% normal size

This text defaults to 90% normal  
size

## Alternate

`{ {smaller|Text} }`

= `{ {resize|Text} }`

(i.e. *Text* will appear at 90% normal size.)
