

Template:Unsigneddr

?The preceding unsigned comment was added by [[User:{{{2}}}]] ([[User talk:{{{2}}}|talk]] ? [[Special:Contributions/{{{2}}}|contribs]]) . Please sign your posts!

Usage

This template can be used to label unsigned comments in a conversation to attribute them to the correct user. This template is for easy copy-pasting from the edit history into without having to switch the fields around manually (which is *highly* annoying).

```
{{subst:unsigned|date|user name}}
```

date

(optional, but recommended) timestamp from edit history (remember to label it UTC)

user name

name or IP address of user who left comment

The timestamp from the edit history appears in your local time that is set in your preferences.

In order for the time to be UTC, adjust it using the difference you designated between the server time and local time.

Example

Typing: `{{subst:unsigneddr|09:20, Jun 17, 2005 (UTC)|Admin}}` will yield: ?The preceding unsigned comment was added by [Admin](#) ([talk](#) ? [contribs](#)) 09:20, Jun 17, 2005 (UTC). Please sign your posts!

Redirects

- `{{nosigr}}` (which is short for "no signature, reversed")
