

Usage

Method 1

The following displays the warning icon and the word 'Warning:'. You can follow this with whatever text/images/markup you like.

```
{{warning}} Don't do that!
```

Method 2

The following includes the text passed to the template, and uses a table to stop the text flowing round the icon.

```
{{warning|Here is a long warning, which is sufficiently wordy to run onto a second line,
which would normally cause it to wrap round the icon, but because we passed it as a parameter
it keeps its left alignment straight.}}
```
